Vlietkinderen

Go je
mee?

Is your child going on an adventure at Vlietkinderen?

You are welcome! We have locations for day care and after school care (before, between and after school hours) in Leidschendam-Voorburg and in The Hague (the districts Leidschenveen and Binckhorst). The locations are situated near or in child care centers, often together with elementary school. Our locations are nice places in the neighborhood, easily accessible and with good parking.

Our Story

As a social childcare organization, we are convinced that our world will become a more beautiful place if everyone is given equal opportunities to develop themselves and if together we tackle the challenges of today and tomorrow. Every child may grow up to be an adventurer, artist, inventor, sportsman or scientist, but

above all a world citizen. That is why we strive for everyone to be able to participate. With adventures to discover yourself and the world and thus develop. We offer children a warm, safe environment in which they can be themselves. With fun, professionalism and confidence we help them on their way. Challenges require courage and making your own choices, falling is not a problem - we help you to get up again. Every day a step forward. Every day a new adventure. The future awaits.

Ga je mee?

Our core values

Real - We love real people. We respect everyone's individuality and we do what we promise. We are a reliable partner. Development starts with knowing who you are, what you can do and trust in yourself and others.

Together - As a social organization, we believe that working together is the condition for success. We are close to

parents, partners and colleagues. Connecting these worlds creates a warm environment for children in which they can develop in safety.

Adventure - We are always looking for new adventure, for our children and for ourselves. We want to learn and develop together, explore together. We have fun and move forward every day.

“We look at what a child wants and is able to do.”

Pedagogical, careful and responsible

We want children to have a carefree childhood, where we look at what a child wants and is able to do. In addition to a development-oriented range of activities, we make room for free play, so that a child can choose. With the activities we connect to our core values of real, adventure and togetherness and also to today's society. We encourage children to discover and try things out for themselves. It's okay to go wrong once in a while, they learn from it. They get all the space they need to try again and in this way build up self-confidence. Throughout the day and in all age groups, we encourage the independence of the child.

Professional staff

We invest in our professionals, as a learning organization we ensure that our employees are regularly trained in their field of expertise. In addition, we also train people ourselves to work within the child centers. In their daily work, our employees are guided by pedagogical coaches, among others in the field of working with babies and the early detection of developmental problems in young children.

Everything around the child has our attention

We pay attention to our environment, creativity, culture, sports and healthy nutrition. The more practical matters are also well taken care of. All (bottle) food and care products including diapers and a warm healthy lunch are included in the rate. We do not transport the children by minibus, but walk, cycle or use our recognizable (electric) group bicycle or BSO Bus, which is safe and environmentally friendly. We work closely with elementary school and ensure continuous learning and development and a good transfer.

Safety first!

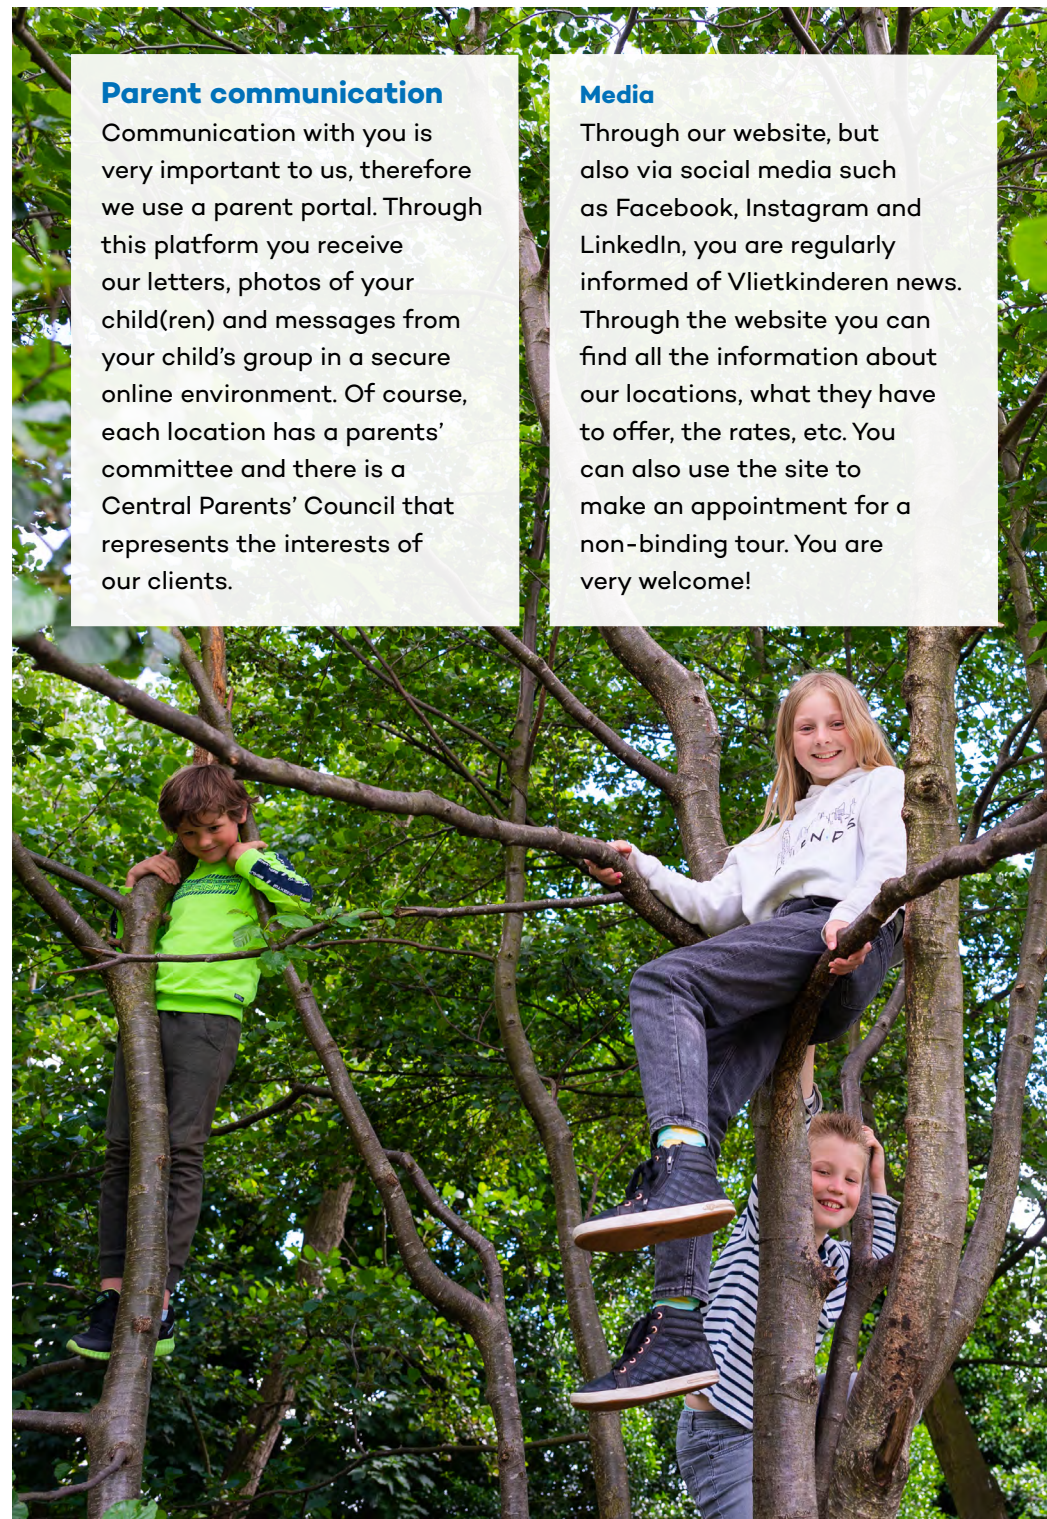

- Vlietkinderen selects and screens its employees very carefully.
- Each employee has a Certificate of Good Conduct (VOG).
- At each location there is someone present with a certificate for in-house emergency response (BHV) and first aid for children (EHAK).
- Our locations are not accessible without permission; we work with tags, a security system that only allows access to parents/carers, children (BSO) and staff.
- We apply the 'four-eyes principle', there are always several employees in a group.
- Our playground equipment is regularly inspected by competent authorities.

Parent communication

Communication with you is very important to us, therefore we use a parent portal. Through this platform you receive our letters, photos of your child(ren) and messages from your child's group in a secure online environment. Of course, each location has a parents' committee and there is a Central Parents' Council that represents the interests of our clients.

Media

Through our website, but also via social media such as Facebook, Instagram and LinkedIn, you are regularly informed of Vlietkinderen news. Through the website you can find all the information about our locations, what they have to offer, the rates, etc. You can also use the site to make an appointment for a non-binding tour. You are very welcome!
